

# LEADING MARKETS OF GROWTH

## ALL GOODS

## FOOD & ENERGY

Product categories are based on end-use classification.

Growth rate calculations use 1989-1995 averages as their starting points and annual data for 2001 as their end points.

The selected markets in each growth chart are the ten for which the computed rates of growth differ most from the average for all markets. However, markets which represent less than one quarter of one percent of U.S. exports in 2001 are excluded.
